

## **Footnotes**

1. Sum of our driver-partner earnings and merchant-partner earnings. 'Driver-partner earnings' is defined as the fare, bonuses, tips and fees, net of commission. 'Merchant-partner earnings' is defined as the total order bill, including taxes charged by the restaurant/merchant net of commission, Grab advertising spend and promotion costs.
2. Small merchants refers to businesses that are non-chain, non quick service restaurants across our GrabFood and GrabMart offerings.
3. Data from our 8 countries of operation across our mobility and deliveries business segments. We define road accidents as any accident caused by the driver-partner that occurs on-trip resulting in physical injury to the driver- partner, passenger and/or a third party.
4. Grab driver-, merchant-partners and Kios agents with disabilities and who have had at least one transaction on our platform within the year of 2021.
5. [The World's Top Female Friendly Companies](#), Forbes, 2021.
6. Includes online and offline merchant-partners.
7. Wage parity index is an aggregated ratio of female to male employees' total compensation after taking into consideration role and location differences. The figure considers only full-time employees and does not include OVO. OVO personnel number will be included in subsequent reports.
8. Upskilling and training courses do not include mandatory courses. There are additional courses outside of GrabAcademy that are not included in this count here.
9. Around 30,000 trees were planted and over 2,300 tonnes of verified carbon credits were retired as a result of our carbon offset feature. Grab planted an additional 12,000 trees through internal fundraising activities and partnerships with stakeholders.
10. Based on an online survey that reached 108 driver-partners with disabilities, conducted by NielsenIQ from 23 December 2021 to 3 January 2022 in Indonesia, Malaysia, Singapore, Philippines and Thailand.
11. Indonesia, Philippines, Vietnam, Thailand, Singapore and Malaysia.
12. This training programme was delivered in collaboration with Infra Digital Foundation, a non-for-profit organisation in Indonesia's education development sector.
13. Our employee gradings start from G1 and extend to G10. Leadership roles are G7 and above.
14. Results highlighted here were from the latest Grabber Engagement Survey done in the second half of 2021 and was completed by 89% of full-time employees.
15. Applicable where we provide ride-hailing, delivery and financial services through our existing subsidiaries under our operational and management control. Grab's roadmap and targets are set in consideration of future business growth. We utilised data from 2019 as the baseline for absolute greenhouse gas emissions as 2020 and 2021 was materially impacted due to COVID-19 movement restrictions, where our business saw a significant decrease in our mobility services, the most material contributor to our carbon footprint.
16. Singapore, Cambodia, China, India, Indonesia, Malaysia, Myanmar, the Philippines, Thailand, Vietnam, Romania, and the United States.
17. From unbundled Renewable Energy Certificates.
18. Includes Battery Electric Vehicles, Extended Range Electric Vehicles, Plug-in Hybrid Electric Vehicles, and Hybrid Electric Vehicles.
19. Fully electric vehicles refer to vehicles with an electric motor instead of an internal combustion engine (e.g. Battery electric vehicles).

20. These are of a minimal Vehicular Emissions Scheme (VES) A2 band (such as a Hyundai Kona Electric, Toyota Prius or Kia Niro Hybrid). The VES is based on a car or taxi's carbon dioxide (CO<sub>2</sub>) emissions, plus emissions of hydrocarbons, carbon monoxide and nitrogen oxides. Vehicles in the VES A2 band emit less than 125g of CO<sub>2</sub> per kilometre, as defined by Singapore's Land Transport Authority.
21. The purchased RECs meet the APX Tradable Instrument for Global Renewables (TIGR) Registry and the International REC (i-REC) standards, helping ensure a transparent account of the environmental impact. 1 REC means that 1MWh of electricity was generated from a renewable energy resource.
22. All RECs purchased are from renewable energy generated from solar energy projects with almost 80% sourced from Indonesia, Malaysia, The Philippines, Singapore, Thailand and Vietnam.
23. When the amount of carbon dioxide emissions associated with building operations is reduced (highly energy efficient and fully powered from renewable energy sources) to a level consistent with reaching net zero in 1.5 degrees Celsius, and any residual emissions that are infeasible to eliminate should be neutralised through carbon removals.
24. Singapore, Cambodia, Indonesia, Malaysia, Thailand, Vietnam.
25. Each carbon credit is generated for 1 tonne of greenhouse gas emissions reduced or removed from the atmosphere. In the voluntary carbon market, carbon credits verified against international standards ensures the credibility of the emission reduction achieved.
26. Singapore, Malaysia, Indonesia, Vietnam, Thailand, Philippines. We aim to roll this out in Cambodia and Myanmar by the end of 2022.
27. Includes data from our deliveries business in Indonesia, Singapore, Malaysia, Vietnam, Thailand, Myanmar, Cambodia and the Philippines.
28. Significant monetary fines are defined to be any fines above US\$1,000,000 paid out in the reporting year.
29. This includes any breaches concerning the unauthorised collection, processing and/or disclosure of personal data.
30. Based on an online survey that reached 1992 driver-partners who received assistance from Grab through Covid-19 period, conducted by NielsenIQ from 23 December 2021 to 3 January 2022 in Indonesia, Malaysia, Singapore, Vietnam, Philippines and Thailand.
31. A joint venture of medical portal created by Ping An Good Doctor and Grab.
